FYI related to seafood and oil spills from NOAA.
Thanks
Miguel Cruz

FYI. I realize we weren't specifically tasked with anything on this but I asked our Applied Toxicology Branch in DTEM about seafood issues. Dennis Jones found this at the NOAA HazMat site. Ruth Yender, one of the authors, is one of their SSCs. Chapter 4 seems to be the thing that deals with what might be found in seafood. Apparently, one of the examples is SE Louisiana Crude. Anyway, this may help inform the Epi and Lab preparedness efforts.
